## **Strategic Plan**

The strategic improvement plan for Decatur County Schools is comprised of strategic goal areas that were identified by system leaders and stakeholders. The plan is a living document that will be updated annually based on data, survey feedback and progress toward specific goals.

The Balanced Scorecard Accountability Model will be used to increase organizational effectiveness and efficiency. The Balanced Scorecard was developed by Robert Kaplan and David Norton of Harvard University. The Balanced Scorecard has a three-fold purpose; it serves as a measurement tool, management tool, and a communication tool. The use of this model will result in more effective communication with the public and documented progress toward system goals using a variety of accountability measures. The Balanced Scorecard has become a roadmap that measures performance and translates strategies into action plans.

Decatur County Schools will use this accountability model in conjunction with GSBA/GSSA Vision for Public Education standards and the AdvanceED standards for quality school systems to guide the strategic direction of the school system. We will also utilize the following to provide direction to the strategic planning and continuous improvement processes:

- (1) School and System Improvement Plans
- (2) 2013 – 2018 School Facilities Plan
- (3) College and Career Ready Performance Index
- (4) Decatur County Schools Annual Report
- (5) Statewide Longitudinal Data System
